## PROFESSIONAL SUMMARY

AI/ML Engineering student specializing in building AI-powered **backend systems**. Experienced in developing **REST APIs** using **FastAPI**, implementing **RAG-based pipelines**, and deploying **containerized** applications on **AWS (ECS Fargate)**. Combines strong problem-solving skills with a solid foundation in **data structures** and software engineering to design scalable and maintainable systems.

## TECHNICAL SKILLS

**Programming Languages/Tools:** Python, SQL, JIRA

**Core Concepts:** Data Structures and Algorithms, Object-Oriented Programming (OOPs)

**Libraries:** NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn

**AI/ML:** Neural Network, NLP, Computer Vision, RAG, LLM Application

**Cloud & DevOps:** Docker, AWS (ECS, Fargate), CI/CD (GitHub Actions), vector database

## PROJECTS

- Document Comparison and Summarization Portal**
- LangChain | RAG | FastAPI | Docker | AWS ECS | CICD
  - Developed scalable REST APIs using FastAPI for document processing workflows
  - Implemented RAG pipeline for context-aware summarization
  - Containerized using Docker and deployed on AWS ECS (Fargate) with CI/CD via GitHub Actions
  - Designed modular backend and added unit tests for reliability
- Real-Time Vehicle Tracking & Counting System**
- OpenCV | Kalman-Filter
  - Developed real-time multi-object tracking system using OpenCV and Kalman Filter
  - Implemented logic to track and count individual vehicles across frames
  - Handled dynamic traffic conditions and partial occlusions
  - Optimized tracking consistency for improved counting accuracy
- AI-Powered Food Ordering Backend**
- FastAPI | REST APIs | Chat Bot
- Developed backend APIs for handling food ordering workflows
  - Designed endpoints for menu retrieval, order placement, and request handling
  - Structured application with modular components for scalability and maintainability
  - Implemented request validation and response handling for smooth API operations

## EDUCATION

- B.Tech in Computer Science Engineering (AIML)**  
GL Bajaj institute of technology (Abdul kalam technical university)  
2023 – 2027
- Higher Secondary Education(2022) : 78%**
- Secondary Education (2020) : 82%**

## ACHIEVEMENTS

- Scored 90% in JEE through self-study**
- Solved 300+ problems on Codeforces and Leetcode**  
@codeforces rating: 1200
- Runner-up, Hackinfinity Hackathon, Inter-college competition**
- Ranked 1200 out of 200,000 participants in Naukri Campus Young Turks**

## CERTIFICATIONS

- Supervised Machine Learning: Regression and Classification (Coursera | Andrew Ng)
- Advanced Learning Algorithms (Coursera | Andrew Ng)
- OCI Generative AI Professionals (Oracle Race to Certification)
