Objective

Aspiring ML Engineering student with a passion for simplifying complex problems. Currently pursuing a B.Tech in CSE (AIML) and actively developing my skills to excel in the field of Machine Learning. Currently learning and enhancing my expertise in Computer Vision.

Education

B.Tech in Computer Science Engineering (AIML)

GL Bajaj Group of Institutes | 2023 - 2027

Projects

- Vision AVI :

- A vision-based project and a product for visually impaired persons. It includes multiple real-world scenarios like object detection, object tracking, facial expression recognition, and more.
- Collection of data and validation completed and working on backend systems.

- Hybrid Recommendation System: • Used collaborative filtering and content-based filtering techniques. Interactive data visualization for recommendation insights.

[Project Link](#)

- Email Spam Detection:

- Used multiple algorithms to improve performance. Achieved a high accuracy of 98%. Applied NLP techniques for personalization.

[Project Link](#) -

Loan Default Prediction System:

- Improved model accuracy from 79% to 88.4% using multiple algorithms. Involved in data preprocessing, hyperparameter tuning, and data analysis.

[Project Link](#)

Skills

- Programming Languages: Python, C
- Machine Learning: Scikit-learn, Data Preprocessing, Hyperparameter Tuning, Image Preprocessing
- Libraries: NumPy, Pandas, Matplotlib, PyTorch Neural Network, Computer Vision, NLP
- Soft Skills: Team Coordination

Certifications

- Supervised Machine Learning: Regression and Classification (Coursera | Andrew Ng)

[Certification Link](#)

- Advanced Learning Algorithms (Coursera | Andrew Ng)

[Certification Link](#)

Achievements

Scored 90% in JEE through self-study.

Secured 72.5% in the first year of B.Tech.

Experience

- Volunteer, Annual Fest: Gained valuable experience in team management by coordinating events at GL Bajaj Group of Institutes.
